

HIGH LEVEL DISINFECTANT & CLEANER

Food , Grease, Animal Waste

Bird droppings and Human Waste

Blood, Sweat, Bacteria

PRODUCT DESCRIPTION:

CYCLONE CLEAN HIGH LEVEL DISINFECTANT CLEANER is a water-based, biodegradable formula engineered to kill 99.99% of bacteria and viruses on surfaces. When used with heated water and Cyclone Technology pressure cleaning equipment that heats up to 160 degrees, provides unmatched disinfecting and cleaning results.

FEATURES:

- No caustics or solvents
- Cleans and Deodorizes
- Easy application & No Residue
- Environmentally safe and Biodegradable
- Safe on equipment and stormwater systems
- Non-flammable and non-combustible

KILLS 99.99% PATHOGENS

- Bird Droppings
- Animal Waste
- Human Waste
- Food Spills

SAFE TO USE:

- Sidewalks and Pathways
- Concrete and Asphalt
- Brick, Steel and Plastic
- Pet Areas
- Food Courts & Common Areas
- Parking Areas
- Parks and Recreation
- Animal Friendly
- Synthetic Surfaces

WHAT IS IT:

CYCLONE CLEAN HIGH-LEVEL DISINFECTANT specially formulated cleaning product designed to disinfect and kill most microbial pathogens in exterior environments.

WHAT IS IT USED FOR:

Effectively removes pathogens in environments ensuring a healthy and clean space while preventing potential health related sickness caused by these organisms.

HOW IT WORKS:

Utilizing active ingredients, it breaks down the cell structure of these microbial pathogens. This effectively eliminates or makes them inactive on surfaces. The cleaner is applied, allowed to dwell, and then rinsed off, leaving the surfaces clean.

Application Guidelines:

Pressurized Water Systems: This method employs the use of heated water-blasting equipment and cleaning solution. Strategically designed to be applied to the surface to allow a short dwell time on the surface to remove all the contaminants.

Application: Dilute disinfectant 3:1 (Water : Disinfectant). Use hand or power spray equipment and spray directly on surface. Clean area using low pressure recovery equipment. For best sanitation practices, use heated water up to 160 degrees with Cyclone Technology heated low pressure machines.

Birds have been associated with not only the Avian Flu but more than 50+ diseases. Birds are drawn to the smell of their own waste and continue to build their flocks in the area. The diseases spread by their waste can become airborne, transferring to humans just by being in the same vicinity as the droppings. The droppings are also high in Uric Acid, which is damaging to vehicles, machinery, roofs and more. Using Cyclone Clean Disinfectant along with our heated pressurized water machines disinfects, cleans and deodorizes in two simple steps.

Specifications:

- Readily Biodegradable Yes
- Flammable/Combustible No
- Water Solubility 100%
- Contains Terpenes No
- Caustics No
- Oil/Water Separator Compatible Yes
- pH Concentrate 12.0-12.3
- Color/Characteristics Green/Liquid

Cyclone CLEAN
HIGH LEVEL DISINFECTANT CLEANER

Eliminates Harmful 99.9% Pathogens
Deep Clean and Deodorize with No Residue
Biodegradable & Environmentally Friendly
Safe for the Outdoors & Stormwater Systems
No Caustics or Solvents-Safe for Equipment
Fast and Efficient Results

FOR USE ON			
SIDEWALKS	WALLS	CONCRETE	ASPHALT
STEEL	PLASTIC	BRICK	

KILLS 99.99% OF PATHOGENS
BACTERIA VIRUSES

1 Gallons = 3.78 Liters

Faster, Greener, Cleaner

Safety/Caution:

Rubber gloves are recommended to prevent drying of the skin. Goggles are recommended to protect eyes if splashing is expected. Wear a rain suit and boots to keep clothes dry when using the product in steam cleaning and/or pressure washing applications. Harmful if swallowed. Avoid getting into the eyes. If contact occurs, flush with running water. If irritation persists, get medical attention. May cause dryness of skin with prolonged use; wash hands with cold water and apply a hand lotion. For sensitive aluminum alloys, testing a small part prior to full-scale operation is recommended.
