

ORGANIC GROWTH REMOVER

PRODUCT DESCRIPTION:

CYCLONE CLEAN ORGANIC GROWTH REMOVER a water-based formula engineered to quickly and efficiently remove mold, mildew and algae from surfaces. It works exceptionally well with Cyclone Technology heated pressure cleaning equipment. It can be used on all surfaces, to include concrete, asphalt, wood, brick or vinyl.

FEATURES:

- Prevents regrowth of mold, mildew & algae
- No caustics or solvents
- Compatible with oil water separators
- Certified by Boeing, McDonnell Douglas, EPA, & AST specifications

BENEFITS:

- Biodegradable
- Safe on equipment and stormwater systems
- Restores friction to surfaces
- Easy application & no harmful toxins
- Non-flammable and non-combustible
- Environmentally safe

WHAT IS IT:

CYCLONE CLEAN ORGANIC GROWTH REMOVER is a specialized cleaning product designed to remove and prevent the growth of mold, mildew, and algae in exterior environments. This reduces the frequency of cleaning and maintenance, saving time and resources.

WHAT IS IT USED FOR:

It is used to effectively remove and prevent the growth of mold, mildew, and algae from surfaces, ensuring a healthy and clean space while preventing potential damage to structures caused by these organisms.

HOW IT WORKS:

It works by utilizing active ingredients to break down the cell structure of these organic growths. This destroys the mold, mildew, and algae, effectively eliminating them from surfaces. The cleaner is applied, allowed to dwell, and then rinsed off, leaving the surfaces clean and preventing future growth. Regular use of this cleaner helps maintain a clean and visually appealing environment.

Application Guidelines:

Pressure Water Systems: This method employs the use of water-blasting equipment and cleaning solution. Strategically designed to be applied to the surface, allow a short dwell time to penetrate down into the porous surface to remove contaminants, resulting in a longer time before mold, mildew or algae will regrow on the surface.

Hand Application: Spray with backpack or hand spray equipment directly on surface and let dwell 5-10 minutes before rinsing. Can be applied at full concentrate and diluted up to a 3:1, depending on amount of growth.

Organic growth can create slippery surfaces and have a negative impact to the appearance of sidewalks and parking garages, especially when wet. Mold and mildew can release spores that pose a health risk and create a negative environmental impact to the surrounding eco-system. Regular Cleaning and inhibiting their growth can reduce this impact and help you meet regulations and building codes. Removing mold, mildew and algae from surfaces enhances safety, aesthetics and structural integrity while providing a healthier environmental.

Specifications:

- | | |
|----------------------------------|-------------|
| • Biodegradable | Yes |
| • Flammable/Combustible | No |
| • Water Solubility | 100% |
| • Contains Terpenes | No |
| • Caustics | No |
| • Oil Water Separator Compatible | Yes |
| • pH Concentrate | 12.0-12.3 |
| • Color/Characteristics | Blue/Liquid |

Safety/Caution:

Rubber gloves are recommended to prevent drying of the skin. Goggles are recommended to protect eyes if splashing is expected. Wear a rain suit and boots to keep clothes dry when using the product in steam cleaning and/or pressure washing applications. Harmful if swallowed. Avoid getting into the eyes. If contact occurs, flush with running water. If irritation persists, get medical attention. May cause dryness of skin with prolonged use; wash hands with cold water and apply a hand lotion. For sensitive aluminum alloys, testing a small part prior to full-scale operation is recommended.
